Driverless Warehouse
Pallet Management Software

NEW
MODULE!

Magic Warehouse For 4D Shuttle®

- Retrieve pallets in a “lights-out” rack block
- Shuttle moves forward, back, and sideways for automated pallet movement
- No forklifts required

For 25+ years, the **Magic Warehouse™ software suite** has provided carousel-based, goods-to-person (G2P) automation. Developed to provide cost-effective, user-friendly warehouse solutions to small- and medium-sized businesses the suite enables users to batch pick upwards of 24 orders concurrently, while also automating batch put-away from carts, conveyors and stationary racking.
